WORLD CUP RACING OVERLIMIT PLUS - GS

Blossom ski strongly recommends this ski to those that love going fast down a GS slalom. The rigid aggressive structure guarantees high level performance GS slalom. A high level model that could perform any GS settings, ideal on steep icy terrain, perfect when the snow is hard and difficult and great grip, stability and a uniform edge to suit the terrain. The high performance technical level is enhanced by its structure "world cup Sandwich and Wood Core Technology". don't have to comply with FIS rules.

WORLD CUP

WORLD CUP RACING FOLLOW ME FIS - SL

High level of performance with no extra frills, designed by Blossom ski for slalom racers. Made with world cup Sandwich and Wood Core Technology structure. High level performance ski, precise and with great acceleration on hard snow performing short turns. Follow designed and tested by Blossom technicians. "The perfect combination of titanal, wooden core and bre glass guarantees quick efficient turns on hard snow with World Cup style precision."

PERFORMANCE RACE CARVE FLY UP PLUS

One down the racing skis, made with same structure it is a bit easier thanks to a more relevant side cut. These characteristic make this model suitable for advanced skiers as high level racer, high level ski instructor, high level skier with race technic. Our Fly Up model performs at its best on high speed carving medium to long turns. even on icy hard snow. Thanks to its sandwich structure and Wood Core Technology, the Fly Up guarantees great stability at any speed. (This race carve model is often the GS racing ski younger brother because its shape and materials make it a bit more forgiving).

PRO ATHLETE

WCAS14PROFCF-BL
V614BL - V816BLOSS01

PERFORMANCE RACE CARVE FLERE PLUS

Designed for high level skiers. This ski has the same building and structural characteristics of racing skis, just a bit easier thanks to a different side cut with a strong central core, stability and vibrations management. The main characteristic is a strong agile side cut that makes the ski fun and very lively. The Flere turn radius gives great manoeuvrability perfect for any steepness. This ski is for tiger level skiers ski on and want a stable and precise ski. Versatile ski, suitable for short to medium radius turns, quick edge grip and good carving.

SPORT CARVE GREAT SHAPE

With Great Shape model you cannot wrong, designed for a wide range of conditions, always guaranteeing a high level of performance. (This race carve allows even distribution of pressure along the whole ski edge). Aggressive are the main characteristics of this model which embodies the nippy race carve qualities and manoeuvrability and comfort of easier models. elastic Flex with a good torsion rigidity is the perfect mix for such a versatile ski. We recommend the Great Shape to an intermediate/advanced skier, with a technical and precise skiing style.

167 178 188

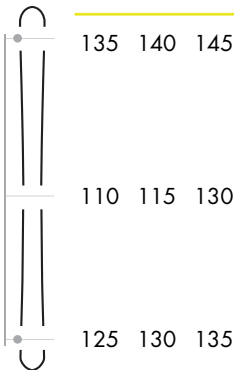

FREERIDE - TOUR - PARK NAMASTE

Ideal in any conditions. The Namaste will take you anywhere. Powder, wet snow, wind affected snow, groomed piste...this ski will accompany on the piste but especially off piste and you will be wondering why use anything else. Great exibility on soft snow and great adaptability on variable conditions. Sandwich structure and tip rocker technology, this ski is the true all mountain leading ski.

165 175 185

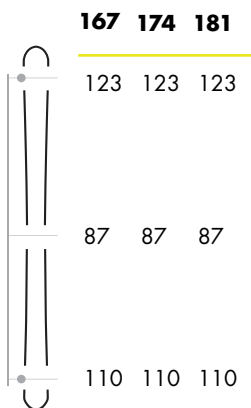

FREERIDE - TOUR - PARK OFFSHORE

The Offshore was designed and built for those skiers who do not want to stay on the piste. It is a true off piste machine, the Offshore oats on pristine powder on variable terrain guaranteeing comfort and great grip. It is perfect on all snow types and great for high speed off piste skiing. Easy to manage and super fun. Thanks to the rocker technology, the ski turns so easily that you would think shorter ski under your feet.

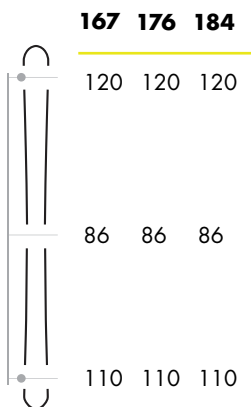

FREERIDE - TOUR - PARK

FREERIDE - TOUR - PARK

v

Perfect mix to enjoy uphill ski touring and still have great performance on the downhill thanks to the reduced weight and sandwich structure. The core is designed with a special type of wood that makes this ski light, reactive, manoeuvrable and very versatile.

FREERIDE - TOUR - PARK WONDERLAND

People that have been using it in the Park describe it in two words: "robust and light". Thanks to the sandwich structure and high quality wooden core, the freetibet gives powerful take offs and stability when landing. Recommended for those who want to start freeride and not only for freestyle because of its soft structure and manoeuvrability. You can decide where to position the bindings (usually the bindings is perfectly centred on the ski for freestyle).

SKI TOURING ICON 66

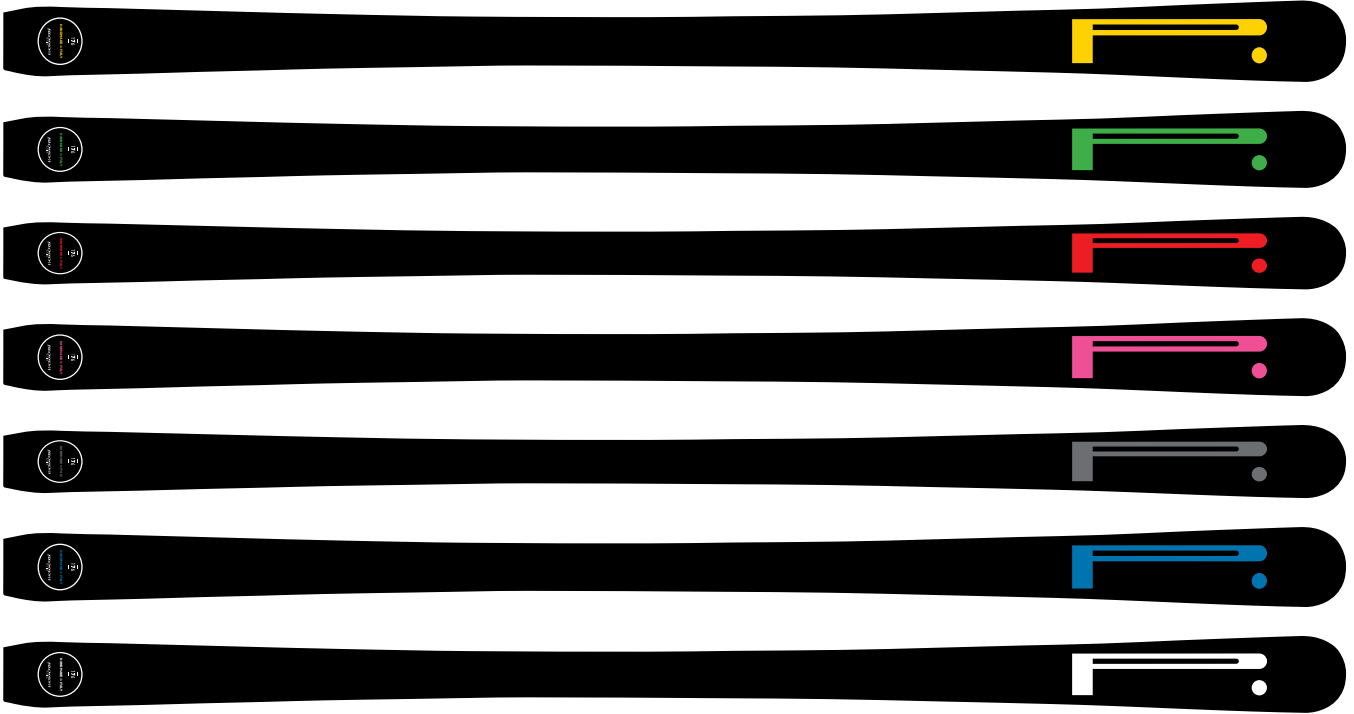

Ski touring

This ski comes from partnership between Pirelli and BlossomSki and it has been designed for a demanding skier, searching for something unique. Wooden core, graphite sole, double Titanal layer to stabilize skis, Fiberglass to allow a perfect torsion, the new PirelliSki by Blossom has also a unique plus: a secret special mix studied by Pirelli to dampen up to 60% the energy of stress suffered by ski on the slope. Special gum mix is vulcanized at high temperature to obtain a thin layer, which is put into the core and on ski top. There it is, a ski which allows the skier to reach great performances both on short and wide turns. Skiing becomes easier, and the excellent stability makes turns precise and regular. The iconic well-recognized P as Pirelli will be positioned on graphics, and skis will come in 7 colours, the 7 colours of Pirelli competition tires. Each colour will be in limited edition, up 110 pieces.
